

Actividad 1 — Diagnóstico de faltantes (Titanic)

Al revisar los datos, encontré que Cabin tiene 687 datos faltantes (77%), Age tiene 177 (20%) y Embarked tiene 2 (0.2%).

Estos resultados coinciden con los del notebook 2.2, tanto en las columnas afectadas como en los porcentajes de datos faltantes.

Data Sampler - Orange
✕

Sampling Type

☒ Fixed proportion of data:

80 %

☐ Fixed sample size

Instances:

☐ Sample with replacement

☐ Cross validation

Number of subsets:

Unused subset:

☐ Bootstrap

Options

☒ Replicable (deterministic) sampling
 ☒ Stratify sample (when possible)

Nota sobre imputación (Preprocess 1)

En esta versión de Orange no aparece la opción Median, sino Average/Most frequent. Por eso, Age se completa usando el promedio y Embarked usando la moda.

Además, se usa la salida Preprocessor para aplicar el mismo proceso al conjunto de prueba y así evitar usar información de esos datos antes de tiempo.
